## **BNMIT inaugurates first-year engineering classes**

BENGALURU: "Students can achieve success in life by developing determination, a strong desire to achieve and the habit of hard work," said Sri Veereshananda Saraswathi Swami, president of Ramakrishna Vivekananda Ashrama, Tumakuru. He was speaking at the inauguration ceremony of first-year engineering classes at the BNM Institute of Technology (BNMIT). He said it is natural for students to be attracted to various things. However, such attractions are temporary and not permanent in life. Therefore, instead of taking wrong decisions for small reasons, students should strive to achieve success through determination, perseverance and hard work.
