BNMIT Inaugurates Centre of Excellence

Focus on Research in Deep Technology and Clean Energy

28th, Oct 2026
Bengaluru

BNMIT Institute of Technology (BNMIT), in collaboration with GreenH2 India and New Energy Opportunities (NEO), has inaugurated the Centre of Excellence in Innovation in Deep Tech and Clean Energy on its campus. The Centre of Excellence was inaugurated by Jay Sinha, CEO of GreenH2 India, and Narayana Rao R. Maanay Chairman of BNMIT.

Speaking on the occasion, Jay Sinha, CEO of GreenH2 India, said, "Several research initiatives in clean energy and deep technology are currently underway in the country. We have established this Centre of Excellence at the college to encourage research in these fields. This initiative will enable students and faculty members to undertake more research. We will also facilitate the transformation of their projects into marketable products and support their commercialisation." He further stated that the centre would focus on addressing fundamental engineering challenges and promoting green energy. It would also facilitate in-depth research into alternative energy storage, battery recycling, digital twins and energy grids.

From Left to Right: **Dr. Vivek Koncherry** - Founder CEO & Chairman Graphan Innovation; **Mr. Akira Tanaka** - VP & Head APAC; **Mr. Jay Sinha**; **Ms. Ofir Amami** - Head of Trade Economics, Mission of Embassy Israli in India; **Mr. Elliott Parker** - CEO Alloy Partner USA; **Mr. Vasanth Palliyath, Mr. Vasanth Palliyath, Narayana Rao R. Maanay** (Chairman of BNMIT), **Prof. T. J. Ramamurthy** (Director of BNMIT), **Dr. S. Y. Kulkarni** (Additional Director and Principal), **Prof. Eishwar N. Maanay** (Dean), and **Dr. G. N. Krishnamurthy** (Deputy Director), and others.

> "Excluding Australia, the United States and Israel, this is the first time such a centre has been established in India, and it is being launched at our college. Globally renowned companies have partnered with this centre. This initiative will create greater opportunities for research and innovation in the fields of deep technology and green technology."
